PROFESSIONAL SUMMARY

Results-driven Data Science & Machine Learning Engineer with hands-on experience in building and deploying data-driven applications in a full-time, client-based environment. Skilled in Python, machine learning, and backend development using FastAPI. Strong problem-solving abilities and passion for AI.

Education

Bachelor of Technology in Computer Science Engineering **June 2021 – April 2025**

NRI Institute of Technology, Visadala

CGPA:8.09/10 | Percentage:74%

Sri Chaitanya Junior College **June 2019 – April 2021**

Board of Intermediate, Vijayawada

CGPA:8.5/10 | Percentage:85%

Sri Chaitanya School **June 2018 – April 2019**

Sattenapalle

CGPA:9/10 | Percentage:90%

Technical Skills

Programming: Python, SQL, JavaScript

Frameworks: FastAPI, Flask, REST APIs

ML & AI: Supervised Learning, Model Evaluation, Feature Engineering, NLP, Deep Learning, TensorFlow, Keras

Data Analysis: Pandas, NumPy, Matplotlib

Tools: Git, GitHub, Google Cloud Platform

Core Concepts: DSA, OOPs, DBMS

Cloud: Docker, CI/CD, AWS, Google Cloud

PROFESSIONAL EXPERIENCE

Data Science & Machine Learning Engineer Intern(Client-Based) **June 2025 - November 2025**

Social Prachar, Hyderabad, India

- Designed and deployed predictive ML systems.
- Performed data preprocessing on large datasets, improving model efficiency
- Conducted EDA to extract insights from datasets.
- Built REST APIs using FastAPI for ML integration.
- Developed and deployed ML models improving prediction accuracy by 72 %
- Built scalable FastAPI-based ML APIs.
- Developed NLP chatbot handling real-time queries.

Machine Learning Engineer Intern(Client-Based) **November 2025 - March 2026**

Sun-It Solutions, Hyderabad, India

- Designed, developed, and deployed end-to-end machine learning solutions for predictive analytics and decision-making.
- Performed large-scale data preprocessing, feature engineering, and data cleaning to enhance model performance and reliability.
- Conducted Exploratory Data Analysis (EDA) to uncover patterns, trends, and actionable insights from complex datasets.
- Built and optimized machine learning models, achieving up to 72% improvement in prediction accuracy.
- Utilized Python libraries such as Pandas, NumPy, Scikit-learn, and TensorFlow/PyTorch for model development.
- Ensured API security, data integrity, and efficient request handling in production environments.

Projects

AI Conversational Assistant | Python, Java, React, TypeScript, MongoDB **September 2025– October 2025**

- * Built an intelligent conversational chatbot capable of understanding user queries and generating contextual responses using NLP and LLM integration.
- * Designed scalable APIs and handled real-time interactions with optimized response latency.
- * Processed 10K+ user queries.

Human Action Recognition | Python, PyTorch, OpenCV, Scikit-learn **November 2025 - December 2025**

- * Developed a machine learning model to classify human activities from video/image data using deep learning techniques.
- * Implemented preprocessing pipelines and optimized model accuracy through training and evaluation.
- * Achieved 85% accuracy in action recognition.

Flask Chatbot | Python, Flask, REST API, Jinja2, JSON **December 2025 – January 2026**

- * Created a backend chatbot system using Flask to handle user interactions and API requests.
- * Designed lightweight architecture for quick deployment and integration with frontend applications.
- * Reduced chatbot response time by 30%.

Certifications

- Infosys Springboard - Deep Learning for Developers (2024)
- Deloitte Data Analytics Job Simulation (2025)
- GenAI Powered Data Analytics Job Simulation(2025)
- Solutions Architecture Job Simulation(2025)
